

Draft National Park Service Transportation Improvement Program FY 2010 - 2016

All projects reflect "net" costs and do not include transportation planning, engineering design and construction management costs.

Some projects may receive funding as part of the American Recovery & Reinvestment Act of 2009 (P.L.111-5)

Project Cost Estimates were done early in 2008. These costs have been inflated by 4% to account for inflation.

See additional notes at the bottom of this list.

I-3R = Resurfacing, Restoration and Rehabilitation

I-4R = Reconstruction or Realignment

III = Alternative Transportation

II = Congressionally Mandated Facility

I-PM = Pavement Preservation Program

Notes:

1	Final project cost will be influenced by construction inflation.
2	Design is not complete for most of these projects. Final project cost will be dependent on the engineering solution selected for the project.
3	This is a long range planning document. The actual schedule of projects will be dependent on design, permitting, compliance and scheduling needs.
4	An annual (4 %) inflation rate was used for these estimates. The construction annual inflation rate for the past three years has been greater than 10%.
5	As a result of the American Recovery and Reinvestment Act, some projects will be removed from this list, some will be moved forward in time, and some new projects will be added to this list.
6	As a result of improved condition data and technology, some projects will change significantly in approach and cost.
7	As a result of improved condition data and technology, management and prioritization processes will change, resulting in some projects being replaced on this list.
8	The NPS TIP will be updated Summer 2009.
